## Problema lali 10

Tranzadui distribute: -> un coordonator cu mai multe procese Coodoral subsiderat subsiderat

## SCHEMA IN 2 PASI

- cooldonabelul centralizeazo mesajele: daca toale mesajele vin cu Ck si miciunul cu FAIL, se hansmite COMMIT, car in momentul in care vin Goute cu mesajul DONE, atunci - nu se face rollback din propia initiablio, deest daco cooldonatoul cere asta - cooldonatoul poste genera un rollback dicand inainte de commit. 7

## EXCEPTION SAFETY.

-3 minelum de exception safety

( basic guarantee = losà sistemul intr-o stare valido (mo resources an ledre

( strong guarantee = se face nollocal lo dico modificare - fet cammit (no fail)

( no throw (no fail) = deducada
